

Programming Language C Lab

Nazim Minhada, Assistant Professor, Department of ICT, Chandpur Science and Technology University .

Class 1: Basic C Programs for Practice

1. Find the Area and Circumference of a Circle
2. Print ASCII Value of the Character
3. Find the Area of a Triangle
4. Convert a Person's Name in Abbreviated
5. Calculate a Simple Interest
6. Find Greater No. Among the Given Three Number
7. Find the Gross Salary of an Employee
8. Calculate the Percentage of 5 Subjects
9. Convert Temperature Celsius into Fahrenheit
10. Program to Display the Size of the Different Datatype
11. a Check Number Is Positive or Negative
12. Find the Character Is Vowel or Not
13. Calculate Factorial of a Given Number
14. Read Integer N and Print the First Three Powers (N^1 , N^2 , N^3)

Class 2: If/Else C Programs to Practice

1. Program to Check Character Is Uppercase, Lowercase Alphabet or a Digit or a Special Symbol
2. Find the Greatest Among Three Numbers
3. Checking You Are Eligible for Voting or Not
4. Program for Finding Greater Between Two Number
5. Checking Number Is Even or Odd
6. Program to Check Leap Year or Not Using If /Else
7. Check Character Is a Vowel or Not Using If-Else
8. Given Date Month and the Year Is Correct or Not Using If-Else

Class 3: Loops C Programs for Practice

1. Reverse a Given Number Using While Loop
2. Find the Number Is Armstrong or Not Using While Loop
3. Calculate the Sum of Natural Numbers Using While Loop
4. Print Multiplication Table Using for Loop
5. Display Fibonacci Series Using While Loop
6. Find GCD of Two Numbers Using for Loop
7. Find LCM of Two Numbers Using While Loop

8. Reverse a Number Using While Loop
9. Number Is a Palindrome or Not Using While Loop
10. Count Number of Digits of an Integer Using While Loop
11. Find a Generic Root of a Number Using While Loop
12. Print a Calendar Taking Input from User Using a Loop
13. Check Whether a Number Is Divisible by 11 Using (Vedic Maths)
14. Sort a Float Array in Ascending and Descending Order Using for Loop
15. Denomination of an Amount Using While Loop

Class 4: Switch Case Basic C Programs List

1. Temperature Conversion Celsius to Fahrenheit and Vice Versa
2. C Program to Find the Day
3. Program for Calculator
4. Find a Grade of Given Marks
5. Finding Radius Circumference
6. Remove All Vowels from a String

Class 5: Array C Programs List

1. Insert an Element Desired or Specific Position in an Array
2. C Program for Remove Duplicates Items
3. Delete Element from an Array at a Desired or Specific Position
4. Print "I AM IDIOT" Instead of Your Name Using an Array
5. Check String Is Palindrome or Not Using for Loop
6. Convert All Input String Simultaneously into an Asterisk *

Class 6: String Programs

1. C Program for Remove All Vowels from a String
2. C Program to Remove Given Word from a String
3. Convert String to Integer Without Using Library Functions
4. C Program to Upper Case and Lower Case Conversion and Vice-Versa
5. Program for Reverse a String Using Library
6. Reverse a String Without Using Library
7. Compare Two String Using STRCMP Function
8. C Program for Check String Is Palindrome or Not
9. Find Number of Vowels, Consonants, Digits and White Space Character
10. C program to count number of words, characters and lines in a string.

Class 7: Functions C Programs List

1. Bubble Sort Using a Function in Ascending and Descending Order

2. Convert Binary Number to Decimal or Decimal Number to Binary
3. Convert Octal Number to Decimal and Vice Versa
4. C Program for Convert Binary to Octal and Vice Versa
5. Display Prime Numbers Between Intervals
6. C Program to Check Prime or Armstrong Number

Class 8: C Programs for Practice in Pointer

1. C Program for Reverse a String Using Pointer
2. Program for Comparing Two String Using Pointer
3. Open a File(open a Program Itself) Using Pointer

Class 9: Structure Programs

1. Store Student Information Like (Name, Roll & Marks) in C
2. C Program to Store Students Information on Using a Structure
3. Add Two Distances(in Inch-Feet) System Using Structures
4. Add Two Complex Numbers by Passing Structure with Function
5. Calculate the Difference Between the Two Time Period (HH: MM: SS)
6. C Program to Store Information Using Structures, Pointer with Dynamically Memory Allocation

Class 10: Patterns Basic C Programs List

1. Home Pattern with Help of *
2. Diamond Star * Pattern
3. Left Half Diamond Star Pattern
4. Right Half Diamond Star Pattern
5. Hollow Diamond * Pattern
6. Pyramid Pattern Using Star *
7. Right Arrow Star Pattern
8. Left Arrow * Pattern
9. Pascal Triangle Using a Number
10. Christmas Tree Pattern Using *

Class 11: Sorting C Programs

1. BUBBLE Sort in Ascending and Descending Order
2. SELECTION Sort in Ascending and Descending Order
3. INSERTION Sort in Ascending Order
4. QUICK Sort in Ascending Order
5. MERGE Sort in Ascending Order
6. Heap Sort in Ascending Order with Complexity

Class 12: Searching- C Programs List

1. Linear Search Program in C
2. Binary Search Program in C

Class 13: File C Program list

1. C program to print the contents of a file.
2. C program to print the number of lines, words and characters in a file.

Class 14: C program using Structure.

1. Create a linked list using structure in C.
2. Calculate the depth of Binary tree using structure in C.
